PROFESSIONAL SUMMARY

Results-driven Android Developer with 2+ years of experience delivering production-grade mobile applications for global brands like HP, Kodak, and Polaroid. Specialized in Kotlin, Java, MVVM architecture, REST API integration, and Bluetooth-based device communication. Proven track record of improving app performance, reducing crashes, and building scalable, high-quality user-centric mobile solutions.

TECHNICAL SKILLS

Languages: Java, Kotlin, Dart

Android: Android SDK, MVVM, Jetpack Components, Activities, Fragments, RecyclerView

Architecture & Storage: MVVM, Room Database

Networking: REST APIs, Retrofit, JSON

Async: Kotlin Coroutines, LiveData

Firebase: Authentication, FCM

Device Integration: Bluetooth, Printer Integration

UI/UX: XML, Material Design, ConstraintLayout

Tools: Android Studio, Git, GitHub, GitLab

Other: Image Processing, Performance Optimization

PROFESSIONAL EXPERIENCE

Android Developer — C+A Global India | Jan 2024 – Present | Mohali

- Designed and developed production-level Android applications used by global brands (HP, Kodak, Polaroid) with thousands of active users.
- Implemented advanced image editing features (crop, rotate, scaling, filters), improving user engagement and usability.
- Integrated REST APIs using Retrofit, improving data handling efficiency and reducing API response time by ~30%.
- Engineered Bluetooth-based printer connectivity, reducing connection failures and improving printing reliability by ~25%.
- Optimized memory usage and lifecycle handling, reducing app crashes by ~20% and improving overall stability.
- Collaborated with cross-functional teams to deliver scalable features within tight deadlines.

Flutter Developer — C+A Global India | Sep 2025 – Present

- Leading development of cross-platform HP Sprocket application (Android & iOS) using Flutter.
- Migrating native Android/iOS features into Flutter while maintaining consistent UI/UX across platforms.
- Implementing Bluetooth connectivity, image processing, and REST API integrations in Flutter.
- Ensuring performance optimization and achieving near feature parity with native applications.

INTERNSHIP EXPERIENCE

Android Developer Intern — ThinkNEXT Technologies | Jul 2023 – Dec 2023

- Developed Android applications using Java and Kotlin following industry best practices.
- Designed responsive UI using XML and Material Design principles.
- Assisted in API integration, debugging, and performance optimization.

KEY PROJECTS (LIVE APPLICATIONS)

HP Sprocket (Flutter Cross-Platform Migration)

- Rebuilding HP Sprocket application from native Android/iOS into Flutter for cross-platform scalability.
- Implemented Bluetooth printer communication, image editing, and backend API integrations.
- Achieved consistent performance across Android and iOS with optimized rendering and state management.

- Focused on scalability, maintainability, and production-level performance.

Polaroid Snap Touch

<https://play.google.com/store/apps/details?id=com.polaroid.universalapp>

- Developed image editing and Bluetooth printing features used by real-world users.
- Enhanced connectivity stability and improved user experience.

Polaroid ZIP App

<https://play.google.com/store/apps/details?id=com.polaroid.printerzips>

- Optimized printer communication workflows, reducing user-reported issues significantly.
- Improved UI responsiveness and overall application stability.

Kodak Step Touch

<https://play.google.com/store/apps/details?id=com.kodak.steptouch>

- Integrated REST APIs and enhanced performance, improving app responsiveness.
- Improved image editing functionality and feature reliability.

HP Photo Booth

<https://play.google.com/store/apps/details?id=com.hp.photobooth>

- Contributed to feature development and performance optimization in production environment.

Personal Project: Smart Expense Tracker App

- Developed a full-stack Android application using MVVM architecture, Firebase, and REST APIs.
- Implemented user authentication, real-time expense tracking, and data visualization.
- Designed intuitive UI with Material Design principles ensuring smooth user experience.
- Demonstrates end-to-end ownership from development to deployment.

ACHIEVEMENTS

- Contributed to mobile applications used by global brands with thousands of active users.
- Delivered production-ready features impacting real-world business outcomes.
- Improved application performance, stability, and user experience in live environments.

EDUCATION

Bachelor of Computer Applications — Guru Nanak Dev University (2017 – 2020)

12th (PSEB): 86% | 10th (PSEB): 76%

CERTIFICATIONS

- Android Development using Java
- Android Development using Kotlin

ADDITIONAL INFORMATION

- Strong understanding of clean architecture and scalable mobile app design.
- Experience working on high-impact, user-facing mobile applications.
- Passionate about building performant and user-centric applications.
